CONSULTING
SERVICES

24 June 1975

This is to certify that I have examined the following sites, for cultural resources:

1. Museum Site--NW $\frac{1}{4}$, SE $\frac{1}{4}$, Section 4, Township 1 North, Range 7 East, Pennington County, South Dakota.
2. Cultural Park Site--N $\frac{1}{2}$, NE $\frac{1}{4}$, and E $\frac{1}{2}$, SE $\frac{1}{4}$, NW $\frac{1}{4}$, and SW $\frac{1}{4}$, NE $\frac{1}{4}$, Section 8, Township 1 North, Range 7 East, Pennington County, South Dakota.

The files of the South Dakota Archaeological Research Center have been searched and the search revealed that no archaeological or historical sites have thus far been recorded in the above locations.

A field examination, likewise, failed to reveal the presence of significant cultural resources. The area slated for the museum construction contains modern trash deposits and motorcycle trails, but these are not regarded as having any archeological or historical significance.

It is expected that, once construction has begun, should archeological resources come to light, construction will be postponed until the South Dakota Archaeological Research Center can be notified and an on-site inspection/evaluation conducted.
