RE: Request for amendment to "Professional Services, Rapid City Metropolitan Planning Organization, LiDAR, Orthophotography and Elevation Contours" dated 17 February 2015 to extend completion date of contract

Dear Ms. Horton,

On behalf of Fugro Geospatial, Inc. I am hereby requesting an amendment to the contract listed above. The amendment will be for schedule only, there will be no additional costs requested, or change in required deliverables.

All contracted products and imagery have been delivered by Fugro Geospatial to the City of Rapid City against the subject contract, however, we have experienced a software anomaly within the City system that has prevented serving the oblique data from the City's server. Fugro has been working with Angie Tallon at the GIS department to troubleshoot the issues for the last several weeks, and will continue until the software is completely installed and tested to work properly. Viewing capability has been available through Fugro's network since September of 2015, and will continue at no cost until the software has been fully installed and tested on the City's network.

We anticipate a completely successful solution to this issue within the next few weeks; we are requesting an amendment to the existing closing schedule of the contract to June 30, 2016.

Please let me know if any clarifications or additional information is required to facilitate this amendment.

Kind regards,

A handwritten signature in black ink, appearing to read "Les Biven".

Les Biven
Regional Business Development Manager
Fugro Geospatial, Inc.
