RE: Request Authorization to Seek Proposals for Engineering Services for
St. Cloud Street Reconstruction - 5th St. to Highland Ct.
Project Number 19-2487 CIP Number 51036

This project is for the reconstruction of St. Cloud Street from 5th Street to Highland Court (approximately 1350 linear feet). The reconstruction of St. Cloud is needed due to the existing condition of the pavement. The project includes subgrade stabilization, new curb/gutter, asphalt, guardrail, and water main replacement throughout the project area.

Staff proposes to hire a Consultant. The consultant will be responsible for the project design, assisting city staff with acquiring easements, bidding the project, providing construction observation, administration and project closeout.

The project is funded from the 0933 Water Replacement/Improvement fund, 8910 Streets fund, and 8911 Drainage fund.

Based on current information, the project cost is estimated to be \$900,000. Staff proposes to bid and construct the project in 2020.

Ted Johnson, PE
City Engineer

Cc: Public Works Director
