

Rapid City Area MPO 2018 Traffic Counts

The count data shown is typically collected via short-term traffic counts, i.e. less than 48 hours in duration. Unlike permanent counters which collect traffic year-round, short-term counts can be taken only when weather permits, usually March through October. These counts represent a "snapshot" of the traffic conditions during the particular collection period; due to the limited collection window, short-term counts must be seasonally adjusted in order to provide a better representation of traffic conditions on an average day (i.e. Average Annual Daily Traffic - AADT).

12345 2018 Traffic Count
12345 2017 Traffic Count

- Interstate
- Ramp
- Principal Arterial
- Minor Arterial
- Collector
