TAX INCREMENT DISTRICT #67

BROOKFIELD
CITY OF RAPID CITY

Amendment #1 – June 2019

Prepared by the

Rapid City Growth Management Department
February 2008

Amendment #1 – June 2019

INTRODUCTION

Tax Increment Financing is a method of financing improvements and development in an area which has been determined to be blighted according to the criteria set forth in SDCL 11-9. All this is done without incurring a general obligation for the taxpayers of the entire City.

The assessed value of a district is determined by the South Dakota Department of Revenue at the time the district is created by the City Council. This valuation is termed the Tax Increment Base Valuation for the district, or simply the “base valuation.” As the property taxes for the property are paid, that portion of the taxes paid on the Base Valuation continue to go to those entities, (City, County, School, etc.), which levy property taxes.

When in succeeding years, the assessed valuation of the district increases, the total property taxes paid by the owners of property in the district will increase accordingly. That increase in taxable valuation is the “increment.” When the tax bills are paid, only that portion of the tax bill which results from the Base Valuation, is paid to the taxing entities. The remainder of the tax bill, known as the tax increment, is deposited in a special fund. It is this plan which determines how these accumulated funds will be used. It is anticipated that one or more of the properties in this proposed Tax Increment District will be used for commercial purposes. The creation of this Tax Increment District for economic development purposes will not require an additional levy to make up for the School District’s share of the property taxes included in the Tax Increment.

This financing method is invaluable for encouraging growth and development of blighted properties with special re-development problems, since the amount of funds available for use by the project plan is directly related to the increase in valuation which a given project or development will create.

OVERVIEW

This plan proposes that a Tax Increment District be created to assist in the development of residential property located in the Brookfield Subdivision through the development of drainage improvements. The Tax Increment Funds would be utilized for box culverts and grading. The City oversizing costs for water and sewer extensions are included in the Project Plan. The proposed boundaries are located east and west of Haines Avenue and north and south of Country Road. The estimated project cost of the improvements is \$921,091 for the Developer and \$405,160 for the City.

The Tax Increment Financing Committee met on May 22, 2007 and June 5, 2007 to discuss this proposed Project Plan for the Brookfield Tax Increment District and recommended approval of the Project Plan. The Tax Increment District will be financed by the Developer and the City.

At the April 21, 2008 City Council meeting, the City Council incorporated changes within the Project Plan. Those changes include Developer A paying the total City and Developer A costs and removing the City’s portion of the Project Plan. Developer A will include a minimum of eight lots in this phase of the development to be used for affordable housing through an affordable housing entity. In addition, a second Developer B was included in the Project Plan to allow for future drainage improvements on the commercial property as a Necessary and Convenient cost line item in the amount of \$300,000.

The development of the public improvements will enhance the ability for new development to occur in this area increasing the community's economic vitality and expanding the City's property tax base.

The estimated cost of the improvements will be financed by the applicant at the actual certified interest paid at no more than prime plus one-half percent with a maximum not to exceed 9.0% and by the City at an estimated 6.0% interest rate. All project expenditures must be completed within five years of the creation of the district. Should the tax increment revenues exceed the anticipated loan payments, the district debt would be retired early resulting in the full value of the property being returned to the tax rolls more quickly.

PROJECT PLAN SUMMARY

This plan establishes the total project costs, as well as the Tax Increment District funded costs.

Elements of the Project Plan

This Project Plan, as required by SDCL 11-9-13, will address the following elements:

- 1) Public Works and Other Improvements;
- 2) Economic Feasibility Study;
- 3) Project Costs;
- 4) Fiscal Impact Statement; and,
- 5) Financing Method Description.

Additionally, the following exhibits are offered:

- I. General Vicinity map;
- II. Tax Increment District Boundary Map;
- III. Map of Existing Zoning;
- IV. Map of Existing Land Use; and,
- V. Map of Public and Other Improvements.

The Statement of Method for Relocating Displaced Persons, as well as the Statement of Changes Needed in Master Plan, Building Codes and Ordinances do not apply to this Project Plan and have not been included in this document.

ELEMENTS OF THE PROJECT PLAN

1. PUBLIC WORKS AND OTHER IMPROVEMENTS

The project plan includes \$1,051,251 in capital costs associated with funding the culverts and grading, and water and sewer oversizing costs. In addition, the project plan includes \$175,000 in professional services.

2. ECONOMIC FEASIBILITY STUDY

Current Valuation – Brookfield Tax Increment District has been created in accordance with SDCL 11-9-2 to 11-9-11. A vicinity map as well as a boundary map is attached. As of this date, the assessed valuation for the proposed district is projected as \$16,665,200. In accordance with SDCL 11-9-20, the certification of the base value will be requested from the South Dakota Department of Revenue following creation and approval of the district by the City Council.

ANTICIPATED CERTIFIED BASE VALUATION OF PROPERTY

\$16,665,200

Expected Increase in Valuation –

ESTIMATED FUTURE VALUATION OF PROPOSED DISTRICT

Estimated Assessed Value of District	\$16,665,200
Estimated Assessed Value of project (year 20)	\$61,405,400
Other Anticipated Increases in Assessed Value	\$ 0
Estimated Increase in Assessed Value of Land*	\$ 0
Estimated Total Valuation (year 20)	\$78,070,600

*For purposes of this Tax Increment District, the increase in land value is not included in these estimates. Any additional value will pay off the loan earlier than anticipated.

Revenue Estimates from Tax Increments

The Plan anticipates 23 semi-annual payments over 12 years. The potential negative short-term impact on the various taxing entities will be offset by the increase in the tax base in future years.

2007 Owner Occupied Tax Levies and Percentage of Total Levy

<u>Taxing Entity</u>	<u>Tax Levy</u>	<u>Percentage of Total Levy</u>
Rapid City Area School District	9.14	54.7%
Pennington County	4.57	27.4%
City of Rapid City	2.96	17.7%
West Dakota Water District	0.03	0.2%
Total Mill Levy	16.70	100.0%

The estimated tax increment available to pay for project costs in the Plan can be calculated by multiplying the anticipated tax rate by the increment in valuation. This calculation results in the following tax increments, which become available as taxes are paid for the applicable periods.

NOTE: Tax increment payments are calculated using 100% of estimated future property valuation and 100% of expected 2007 mill levy.

3. PROJECT COSTS

Capital Costs – The capital costs of \$1,051,251.29 included in the Project Plan are for Oversizing Water and Sewer Mains, Culverts and Grading.

Financing Costs – The financing costs for this Project Plan are dependent on the interest rate obtained. The allowable interest rate for the applicant will be the actual certified interest paid at no more than prime plus one-half percent with a maximum not to exceed 9%. The interest rate used for this project plan is 9.0% for Developer A and 9% for Developer B. It is estimated that the financing costs will total \$2,043,869.95. If a lower interest rate is obtained, the project costs will be repaid more quickly and the property will be returned to the tax rolls sooner.

Professional Service Costs – Professional service costs for Engineering and Professional fees in the amount of \$175,000 are anticipated in the Project Plan.

Relocation Costs – No relocation costs are anticipated in the Project Plan.

Organizational Costs – No organizational costs are anticipated in the Project Plan.

Contingency Costs – Contingency costs in the amount of \$100,000 are anticipated in the Project Plan.

Necessary and Convenient Payments – Necessary and convenient costs in the amount of \$300,000 are anticipated in the Project Plan for Developer A. In addition, an estimated \$300,000 is anticipated in the Project Plan for Developer B.

Imputed Administrative Costs – All Tax Increment District actions require municipal staff time to prepare and enact. The City shall be reimbursed on March 1, 2013, for its administrative costs in the amount of \$2,050. However, in no case shall the City be reimbursed less than \$1 on March 1, 2013.

4. FISCAL IMPACT STATEMENT

The impact on taxing entities can be derived from determining the tax increment anticipated during the life of the district. The true impact on taxing entities of the Plan is the increase in valuation of the property within the Tax Increment District. The taxing entities are only foregoing that income during the life of the district and will realize that income as soon as the debt from the project costs in the Plan is retired. The purpose of this Plan is to encourage that increase in valuation.

At first glance it may appear that the negative impact on the various entities is notable. But when it is considered that without the use of the Tax Increment Finance proposed in this plan it is very likely that there would be no increase in the taxable value of the property within this district or, at least, any increase would be significantly delayed, the impact can be considered truly positive.

*The Plan anticipates 23 semi-annual payments over 12 years.

5. FINANCING METHOD

The financing method to be used in the funding of this Plan is to be obtained by the applicant. The applicant will be responsible for any interest payments due that are not available from Brookfield Tax Increment District. If the tax increment revenues exceed the anticipated loan payments, the debt will be retired early.

The debt on the Tax Increment District Project Costs covered in the Plan will be retired by deposits made in the Tax Increment District as taxes are paid on the property in succeeding years. The City of Rapid City Finance Officer will make the disbursements from that fund in accordance with this Plan. One hundred percent (100%) of the revenues received will be disbursed to Developer A for project costs incurred by Developer A until those costs are paid. Then one hundred percent (100%) of the revenues will be disbursed to Developer B for project costs incurred by Developer B. According to SDCL 11-9-25, positive tax increments will be allocated to that fund until the debt from the project costs is retired or fifteen years following the last expenditure from the Project Plan whichever comes first. The final payment from this Plan is scheduled to be made on June 1, 2019.

There are two projected amortization rate schedules listed below. Schedule #1 shows the amount to be borrowed by the Developer A using a 9.0% interest rate. Schedule #2 shows the amount to be borrowed by Developer B using a 9.0% interest rate.

AMENDMENT #1 PROJECT PLAN JUNE 2019

Amendment #1 reallocates Contingency Costs in order to reconcile certified project costs with actual expenditures. The South Dakota Department of Revenue established the District's 2008 base valuation at \$21,351,400; this base valuation will not change with this Amendment. The State Department of Revenue indicated that the District's 2018 year-end equalized valuation was \$46,795,247. This year-end valuation provides evidence that the District has stimulated the

general economic welfare and prosperity of the state as required in South Dakota Codified Law 11-9-8. This Amendment reallocates the project costs as follows:

Developer A: A decrease in the Contingency Costs by \$52,969.98 and an increase in the following line item amounts: \$32,969.98 for the water oversizing in Brookfield and \$20,000 for the Additional Imputed Administrative Fee. There are no other adjustments necessary.
