RE: Exception to Section 7.40 of the Construction Specifications – Remove the requirement that the Contractor perform a minimum of 50% of the work

The Water Reclamation Division requests authorization to revise Paragraph 7.40 of Section 7-General Conditions of the City of Rapid City Standard Specifications for, “Rapid City Water Reclamation Facility Digester Motor Control Center (MCC) and UV/Administration Transfer Switch Replacement”, Project No. 19-2485 / CIP No. 51216. The revised specification will remove the requirement that the Contractor perform a minimum of 50% of the work. Because the project consists of multiple subcontractor disciplines and the percentage of work a general contractor will be able to perform is a very small percentage, staff recommends removing this requirement to allow more contractors the opportunity to bid on the project. City Staff believes it is in the best interest of the City to remove the requirement.
