RE: Request Authorization to Seek Proposals for Engineering Services for Canyon Lake District Streets Reconstruction, 19-2535 / CIP# 51098

Staff proposes to seek proposals for the design of the Canyon Lake District Streets Reconstruction project. The reconstruction is being driven by utility replacement and pavement breakup located within the Canyon Lake District. The selected Consultant will develop a prioritization list for the reconstruction of all streets located within the district boundaries. The design will include water and sanitary sewer replacement, storm sewer, and reconstruction of the first two streets on the prioritization list (including pavement, sidewalk, and curb and gutter). The Consultant will be responsible for the design of the project, bidding the project, and assisting City staff with land acquisition. Construction Administration services will be negotiated. Staff proposes to construct the projects in 2022.

The project is funded from the Streets, Water, Sewer and Drainage funds. The project budget is $230,000.00.

Ted Johnson, PE
City Engineer
