Re: Communico Module

Motion: Move to approve the addition of the Broadcast module to Communico Services.

Background: The recent approval of modules with Communico will provide a website platform, events registration, and meeting room bookings.

However, we missed including the Broadcast module with the initial approval. Broadcast will allow real-time postings of meeting room events, both for library-sponsored and outside group bookings. In addition, it will show when study rooms are reserved or available.

Initial cost for the Broadcast module can be paid from the 2019 budget, with ongoing costs calculated into the annual budgets.
