RE: Agenda Item Ref. #: PW011420-10

Dear Mr. Dale Tech and Rapid City Council Members,

We are writing you today as members of Live Well Black Hills (LWBH): a coalition of private and nonprofit community members who work to make the Black Hills a healthier, safer, and more livable place. We are asking you today to support the 5’ sidewalk required to be constructed along Deadwood Avenue, Rapid City, per City Ordinance 12.08.060.

Building sidewalks is an important step to creating greater commerce and economic benefits in communities. Sidewalks create a community that is more accessible for residents of all income levels, providing an important mode of access to businesses and schools. Furthermore, according to the nonprofit organization CEO's for Cities, walkable neighborhoods tend to have higher property values than similar, less-walkable neighborhoods.

Building sidewalks also creates environmental and health benefits. Per the University of Delaware’s Institute of Public Administration, greater access to sidewalks can lead to less automobile use. This means less pollution in the air and a decreased risk of being involved in a car accident. Additionally, they provide a safe place for physical activity, both in transportation and recreation.

Under its most recent Bicycle and Pedestrian Master Plan (2011), the City of Rapid City highlighted its goals of promoting walking in the Rapid City area as a viable mode of transportation. In order to do so, the city must promote the building of sidewalks in both areas currently lacking and in areas of future growth. We see where this area is close to multiple businesses. Sidewalks will allow foot and bike traffic in the future for employees of these businesses to choose to walk or bike to work or on breaks. It makes sense to continue to make this whole area more conducive to pedestrian traffic. This will support not only public health but also promote economic development. Many members of LWBH have seen multiple people walking and biking along the well-worn path along Deadwood Avenue. We are concerned for their safety and for the future of our great city growth. Please require the sidewalks to be installed, creating great beginnings of safe walkability and bike-ability along Deadwood Avenue.

We ask City Council members to support Agenda Item Ref. #: PW011420-10. The walkability of a community is crucial to its growth, access, and overall livability.

Sincerely,

Live Well Black Hills
