Re: Rapid City Public Library Air Handler Replacement

Air handlers 1 (AHU-1) and 2 (AHU-2) are due for replacement, with funding previously authorized through the city's CIP fund. The Library Board also approved funding in the 2020 Board Funds budget to supplement the CIP funding for this project if necessary.

The low bid from Climate Control was approved by the City Council at the February 3 City Council meeting, and the city has sent us a copy of the signed contract for our files.

The Notice to Proceed was acknowledged at the February 3 City Council meeting, and the project is in the submittal process. Skyline Engineering is currently working with Climate Control on preliminary shop drawings related to the rooftop unit and will be reviewing equipment selections. Once approved, Climate Control will move into the ordering and scheduling process.

The project is anticipated to continue through June 17.
