Re: Rapid City Public Library Air Handler Replacement

The library's closure due to the COVID-19 pandemic has not changed the air handler replacement project as yet. Skyline Engineering has reviewed preliminary shop drawing submittals. Climate Controls is measuring the requirements for the fan bulkheads and coils. Final submittals are complete.

The contracts have not been suspended, nor do we anticipate them to be suspended due to the closure. The project is still anticipated to continue through June 17, although that is dependent upon materials supply and labor availability.
