Employer Email:: [Dustin.Dale@AE2S.com](mailto:Dustin.Dale@AE2S.com)  
At which address would you prefer to be contacted?: Home  
Ward:: NA  
I would like to serve on the following: : Airport Board  
Please list education or training relevant to your choice(s):: B.S. in Civil Engineering from North Dakota State University  
Undergraduate Certificate of Land Survey from St. Cloud State University  
Graduate of Leadership Fargo Moorhead West Fargo (FMWF Chamber)  
Graduate of Leadership Rapid City (Rapid City Area Chamber of Commerce)  
Please list work experience relevant to your choice(s):: My experience in Civil Engineering provides a base for the design side of how an airport functions, including water and wastewater. I feel my experience on other boards and my work as a consultant provides a solid baseline on how effective boards function.

Please list community volunteer service relevant to your choice(s):: I was always interested in the business community and coming out of college became active in the Fargo Moorhead West Fargo Chamber, serving on their Young Professionals Network (YPN). Starting on the Business Training committee and eventually working my way through the Chair position of YPN. My family then moved to the Rapid City area in 2015. Looking to continue involvement in a Chamber capacity I joined the local Young Professionals Group, serving on the Steering Committee level for three years, while also completing Leadership Rapid City.

I would like to serve in the indicated position(s) because:: Outside of Chamber related work, I have previously held positions with the North Dakota American Waterworks Association (AWWA), and have become active in the South Dakota section and am currently Chair elect.

Since phasing out of the Young Professionals Group, I have been looking for an opportunity to serve the greater Rapid City area. The Airport is a major focal point for this area, possibly providing a first impression and also the last Rapid City experience as travelers return home. The amount of moving parts associated with the airport, the blend of technical, business, operations, and tourism has me excited on how I can learn to serve the community best in this role.
