Public Works Committee/Common Council

RE: Request Authorization to Seek Proposals for Engineering Services for
Southeast Area Trunk Sewer Reconstruction – Elm Ave to Prairie Ave Project
Project No. 20-2571 / CIP No. 50829

This project includes replacing an existing 12" trunk sewer with an 18" trunk sewer, in
the alignment shown in the attached location map. The design consultant will also
evaluate alternative trunk sewer alignments while considering future regional drainage
improvements for the area. Water mains will also be replaced along the selected trunk
sewer alignment. Total project length is approximately 3,500 LF.

Staff proposes to hire a Consultant to be responsible for the project design, acquiring
easements, assisting City staff with bidding the project, providing construction
observation and project closeout.

Based on current information, the project budget for design, easement acquisition,
construction and construction administration is estimated to be $2,940,000. The project
is funded from the Wastewater Enterprise Fund, Water Enterprise Fund and
Stormwater Enterprise Fund. Staff proposes to bid the project in 2022.

Ted Johnson, PE
City Engineer

Cc: Dale Tech, Public Works Director
