Petition to Rapid City Council

We the undersigned residents of the Johnson Ranch neighborhood do hereby formally object to the proposed rezoning within our development from commercial to low density residential. When we purchased our homes, we were relying upon the information provided to us which showed commercial development. We believe that the rezoning to low density residential would lower the value of our single family homes and be an overall detriment to our neighborhood in the form of excessive traffic and noise, etc. If commercial development is no longer feasible, we propose changing the zoning to low density residential and continuing to develop the same type of single family homes which now exist.
