

## MEMORANDUM

TO: Airport Board  
FROM: Patrick Dame, C.M., Executive Director  
DATE: July 13, 2021  
RE: Authority to Issue RFP for MUFIDS Replacement  
(Multi-User Flight Information Display System)

---

The airport currently owns the monitors in the terminal that display flight information and paid advertising. Each monitor has its own computer device to display the information. These devices are not owned by the airport but are leased by the software provider. We also pay a monthly licensing fee for the software.

The contract with the current provider of our system has been in place since 2017, and expires on December 31, 2021. Staff is requesting permission to issue an RFP for a new system. This will allow us to receive up-to-date technology and provide the best use of our resources.

**STAFF RECOMMENDATION: Staff recommends approval to issue an RFP for a Multi-User Flight Information Display System.**
