Working Session/Common Council:

RE: Request Authorization to Seek Proposals for Engineering Services for Signal Drive and Kellogg Place Street and Utility Reconstruction, Project No. 21- 2670 / CIP 51170

Staff requests to seek proposals for the design of the Signal Drive and Kellogg Place Street and Utility Reconstruction project. The design will include water and sewer main replacement in Signal Drive from the intersection with Highland Court to the eastern intersection with Kellogg Place, in Kellogg Place and in Highland Court. Project also includes street rehabilitation throughout the project limits. Total Project Length is approximately 2860 linear feet. The project is being driven by the need for utility replacements for utilities that have reached the end of their useful life.

Staff proposes to hire a Consultant to be responsible for project design, acquiring easements, and bidding the project. Construction Administration services will be negotiated for each separate phase.

The project is funded from the 833 Sewer Replacement fund, 933 Water Replacement fund, and 8910 Streets fund. Based on current information, the project budget for design, property acquisition, construction and construction administration is estimated to be $3,500,000. Staff proposes to bid the project in the Winter of 2022/2023.

Nicole Lecy, PE
Project Engineer
