

Notes:

1. Plant shall be set plumb and centered in planting hole, and placed on firm soil to prevent settling.
2. All wire caging and burlap and twine (or nursery pot) shall be cut back from root ball and removed from planting hole before backfilling. Spread out or prune girdling, circling or matted roots and loosen the outside soil of the root ball to facilitate root penetration into surrounding soil.
3. Planting hole shall be backfilled with existing soil and approved amended soil mix, if necessary, in at least two lifts, heel tamping and watering in between to remove air pockets.
4. See details 74-2a and 74-2b for additional details.

See plan for species and size

4-6" Shredded Wood Mulch, Unless Otherwise Specified, Pulled Back 6" From Trunk

Finished Grade

Planting hole shall have dimensions as shown, have tapered sides, and shall be no deeper than the distance from trunk flare to bottom of root ball.

Undisturbed Soil
