

Rapid City Water Rates per Month

As Adopted by Ordinance No. 6596 for 2024-2028

Water Rates = (Unit Rate x Number of Units of Water Used*) + Meter Charge**

**Based upon monthly meter readings or estimates;*

A unit of water equals 100 cubic feet (approx. 748 gallons).

***Based on the size of the water meter serving the user and the type of use;*

Also includes an environmental fee surcharge imposed by the State on drinking water treatment systems.
