<p>SCOPE OF WORK: Move all data cables out of the data rack in the area that will be remodeled. We will re-use what cables we can that are long enough to be routed to the new data rack location. Cables that aren't long enough will be pulled in cat6 cable. All new and existing cables will be terminated, labeled, and certified. We will install one 6-strand OM3 MM fiber cable from the main data rack to the new data rack, terminate it and certify it.</p> <p>NOTE: The new data rack is to be provided by the City of Rapid City.</p>
