Final planned development to allow an oversized garage:

We live on ten acres just off south Highway 16 below the water tower. This acreage is on the far north side of Enchanted Hills sub-division. We have owned this property for over 20 years and lived here for 16 years.

My wife and I would like to build an oversized garage for our camper, boat, tractor, and a car. We have been fortunate not to get much damage to vehicles in the past from hail storms. We have had to replace our roof on our home twice.

Presently we have an attached garage with the square footage of 759 sq. ft. We also have a garden shed that is 105 sq. ft. for a total of 864 sq. ft.

The building would be a 40x40 steel building similar to a building you would purchase from Cleary Building Corp. It would not have the need for any water or sewer, only electricity for lighting on the inside and security for the exterior. At this point the Black Hills Energy box is about fifty feet away from the site. The building would only be used for storage of the camper, boat, tractor and a car.

The oversized garage would be 1600 sq. ft. This would bring the total storage square footage for the property to 2464 sq. ft. Because the maximum square footage of storage allowed for a city residence is 1500 sq. ft. this is 964 sq. ft. over the limit. We request an exception to the maximum size storage for a residence, because we have 10 acers of land and enough room to accommodate the garage.

We also request an exception to the minimum required lot size from 20 acers to 10 acers. Our land is heavily wooded to the point we can barely see the roof line of two neighbors.
Our useable land is well below the neighborhood above us. In fact most people don’t know our house is located in this area. It is very secluded and private.

The area where we would locate the building has been the parking space for the camper, boat and tractor for over ten years. It is approximately 50 ft. by 50 ft. with natural growth of trees, plants and grasses established and have been for years. A minimum amount of grading will be needed to accommodate the new garage, such as gravel to level the floor.

We finally have the means to get our property out of the elements. We have agonized for years of the possible hail storm that would damage the vehicles we could not get under cover. When we had the wet heavy snows I was always pushing the snow off the camper and boat. I’m 64 years young, but it gets harder and harder each year.

Thank you for your consideration in this matter.

Sincerely,

Kevin D. Miller

Notes
1. Only the Primary building is shown above.
2. These colors are as close to the actual colors as permitted by printing. Actual metal samples must be reviewed with your Sales Specialist. Colors vary depending upon position and angles.

Energy Miser 30’ 0” width x 40’ 0”(Bays at 8’ o.c.) length x 15’ 4” eave height with 14’ 0” truss clearance from 100’-0” mark.
Truss (Standard Lower Chord) with 3/12 roof pitch.  Default ceiling design: Designed to Support a Future Steel Ceiling
Type foundation: In Ground
Concrete floor: No
Purlin Blocking: Both Endwalls are purlin blocked
30 psf Roof Snow Load with 2”x4” Continuous 2’ 0” inch on center purlins.
- Trusses are “made to order” for each building and designed by our Engineering Department.
- We manufacture a non-spliced laminated treated column with a two bolt saddled truss to column connection for superior strength. The Cleary column has a 50 year warranty against rot and decay.

Exterior Finishes
Roof: Grand Rib 3 Plus
- Lifetime Film Integrity Warranty, 35 Year Fade and Chalk Warranty, and G-90 Galvanizing Up to 1.0 ounce of Zinc Protection.
Siding: Grand Rib 3 Plus
Wainscot: None

Ventilation
Standard Ridge Cap not vented.
None on S1 & S2
None on E1 & E2
