Responsible Parties Signature

2018 IRC Chapter 9, Section 905.1.2 Ice barrier, is hereby amended to read as follows:

905.1.2 Ice barrier. In areas where there has been a history of ice forming along the eaves causing a backup of water as designated in Table R301.2(1), an ice barrier that consists of a least two layers of underlayment cemented together or of a self-adhering polymer modified bitumen sheet, shall be used in lieu of normal underlayment and extend from the lowest edges of all roof surfaces to a point at least 24 inches (610 mm) inside the exterior wall line of the building.

Exception: Detached accessory structures that contain no conditioned floor area.

If the ice barrier is not inspected, the contractor shall provide an affidavit that the ice barrier was installed properly
