More parking this way: D&W Crane of Rapid City lifts pre-cast sections for the new downtown parking ramp in Rapid City. The city and construction crews are still aiming for a Nov. 20 completion date, though Gage Brothers of Sioux Falls is somewhat behind in providing the pre-cast com-

ponents for the structure, according to Bonnie Hughes, community development director for the city. Gustafson Construction of Rapid City is assembling the components and doing the remainder of the work. The two-level structure will have about 320 parking spaces.
