

Parking method

I would like to commend the Downtown Association for wanting to pursue plans for a surface parking area. It is very important to get some kind of parking available as soon as possible. The "flat parking" would provide more spaces per construction dollar.

Aberdeen had a parking ramp and the upkeep was costly. After several years, it was deemed unsatisfactory and demolished.

Let this be an example of a waste of taxpayers money and not solving the parking problem. Perhaps Rapid City Common Council members could contact the City of Aberdeen and find out details of their failure to provide satisfactory parking with the ramp.
