Public Works Committee/Common Council

RE: Request Authorization to Seek Proposals for Engineering Services for Deadwood Avenue Reconstruction – I-90 to Meade County, Project No. 17-2375 and CIP # 50437

Staff proposes to reconstruct Deadwood Avenue from I-90 to Meade County. This is proposed to be a joint project with Pennington County as approximately 1/3 of the Project is in Pennington County. The roadway will be widened to accommodate a shoulder and the pavement will be reconstructed. New driveway and roadway culverts will be included.

Staff proposes to hire a Consultant to be responsible for designing and bidding the Project as one bid package with separate bidder’s schedules for the City and County work. The County will reimburse the City for their portion of the work.

The project is funded from the Street funds and County funds. The project budget for the City portion of the work is two million dollars.

Staff proposes to bid and construct the project in 2019.

Dale Tech, PE
Public Works Director
