The consultant shall facilitate a meeting to determine the assumptions to be used during the course of the study. Resulting from that meeting, the consultant shall develop a Methods and Assumptions Document in accordance with the Method and Assumptions Template for MPO Planning Studies.

3. Baseline Conditions Analysis / Obtain Data:

The consultant is to obtain all data needed to perform the study and assess the existing transportation network within the study area. At a minimum, the study advisory team believes this task will need to:

- a) Obtain and review all applicable access ordinances and guidelines.
- b) Gather base mapping data.
- c) Review existing traffic volume and turning movement data and determine traffic volume count and turning movement count data needs. At a minimum, the following data elements are believed to be needed:
 - (i) Twelve (12) hour turning movements at each of the intersections indicated in Figure 1 and listed in Task 4. Turning movement counts should also obtain separate bicycle and pedestrian counts.
 - (ii) Twenty-four (24) hour volume counts, classification and speed data along the corridor will need to be collected during the same time period.
 - (iii) Traffic signal timing plans of existing signals.

It should be anticipated that peak hour turning movement counts may need to be obtained at additional intersections to check turn lane warrants. Other data elements may be available from SDDOT or City of Rapid City sources. A preliminary list, including an estimate of cost, of all traffic data anticipated to be needed to fulfill the study's requirements is requested to be presented with the written proposal. Vehicle classification is to be obtained per SDDOT procedures.

- d) Identify traffic safety problems based on crash history and potential traffic safety areas based upon local knowledge. The five year history of reportable crashes along the corridor will be provided.
- e) Verify and catalog access locations along the corridor.

- f) Review existing street / roadway design standards of all applicable agencies.
- g) Determine and gather all other relevant data needed to fulfill the study's requirements.

Much of the non-traffic data is available from the SDDOT's GIS system or Rapid City's Interactive GIS (RapidMap). If data is not readily available from these sources, the consultant will be responsible for the data collection for all other necessary data to conduct the study.

4. Existing Traffic and Operations Analysis:

The consultant is to conduct traffic operations analyses using the methodologies of the Highway Capacity Manual 6th Edition (HCM) along the study corridor for existing conditions. Software used to assist in the analyses shall be HCS7. This will include determining the existing corridor level of service for the following segments of the SD44/East Omaha Street, Cambell Street, East. North Street and North Valley Drive Drive corridors.

- SD44/East Omaha Street from La Crosse Street. to Cambell Street

- Cambell Street from East Omaha Street to East North Street
- East North St from La Crosse St. to East Anamosa Street
- East North Street from East Anamosa Street to Eglin Street

This will also include determining the existing intersection level of service for each intersection along the study corridors listed below:

- SD44/East Omaha Street and La Crosse Street
- SD44/East Omaha Street and Cambell Street
- Cambell Street and East Saint Patrick Street
- Cambell Street and East North Street
- East North Street and La Crosse Street
- East North Street and East Anamosa Street
- East North Street and Eglin Street

Additional intersections may be identified as the study progresses.

5. Project Future Conditions (2045):

The consultant shall work with the Rapid City MPO's traffic model and the SDDOT's traffic monitoring group to project future traffic conditions along the study corridor under a "No Build" (Do-nothing) Scenario to the year 2045.

The consultant is to conduct a traffic operations analysis using HCM 6th Edition along the study corridor for the projected conditions. This will include determining the future corridor level of service for the following segments of the SD44/East Omaha Street, Cambell Street, East North Street, and North Valley Drive corridors.

- SD44/East Omaha Street from La Crosse Street. to Cambell Street

- SD44/East Omaha Street from Cambell Street to North Valley Drive

- East Anamosa Street from East North Street to North Valley Drive
- East North St from La Crosse St. to East Anamosa Street
- East North Street from East Anamosa Street to Eglin Street
- North Valley Drive from SD44/East Omaha Street to East North Street

This will also include determining the future intersection level of service for each intersection along the study corridors listed:

- SD44/East Omaha Street and La Crosse Street
- SD44/East Omaha Street and Cambell Street
- SD44/East Omaha Street and North Valley Drive
- Cambell Street and East Saint Patrick Street

- East North Street and Eglin Street

Additional intersections may be identified as the study progresses.

6. Conceptual Design Options for the SD44/East Omaha Street, Cambell Street, East North Street, and North Valley Drive Drive Corridors:

The consultant shall determine and investigate a list of corridor and intersection improvements, cost estimates, and implementation plan along the designated SD44/East Omaha Street, Cambell Street, East North Street, and North Valley Drive Drive corridors that will satisfactorily accommodate the projected traffic demand, reduce crash rates, and consolidate access locations to reduce conflicts.

At a minimum, these conceptual design options are to show:

- Preliminary profile of mainline SD44/East Omaha Street, Cambell Street, East North Street and North Valley Drive and all crossroads affected by the option based upon available contour data.
- Typical section(s) of mainline SD44/East Omaha Street, Cambell Street, East North Street and North Valley Drive and all roadways affected by the option.
- Lane requirements, including auxiliary lanes, of mainline SD44/East Omaha Street, Cambell Street, East North Street and North Valley Drive, on the crossroads, and through intersection areas.
- Turn lane requirements at intersections.
- Future intersection traffic control improvements to achieve an intersection LOS of C or better.
- Permanent signing, lane delineation and other traffic control items necessary.
- Right of Way limits

- Utility impacts/needs
- Access locations that should be removed/consolidated/relocated with the project(s) to enhance traffic flow through the corridor. Future access locations shall be determined in accordance to the Rapid City Access Standards for arterial roadways rather than SDDOT standards for rural highways.
- Location of pedestrian and bicycle access and crossings.
- Proposed locations of bus stop pullouts.
- Desktop review of potential environmental impacts.

7. Determination of Build Scenarios:

Using the list of corridor improvements determined in Task 6, the consultant shall work with the study advisory team to determine up to three potential build scenarios for the entire study corridor.

8. Traffic and Operations Analysis of Build Scenarios:

The consultant is to conduct a traffic operations analysis along the study corridor for the build scenarios for both the existing and the projected 2045 traffic conditions for all build scenarios identified in Task 7.

The consultant is to conduct a traffic operations analysis using HCM 6th Edition along the study corridor for the projected conditions of the build scenarios. This will include determining the existing and future corridor level of service for the following segments of the SD44/East Omaha Street, Cambell Street, East North Street and North Valley Drive corridors.

- SD44/East Omaha Street from La Crosse Street. to Cambell Street
- SD44/East Omaha Street from Cambell Street to North Valley Drive
- Cambell Street from East Saint Patrick Street to East Omaha Street
- Cambell Street from East Omaha Street to East North Street
- East Anamosa Street from East North Street to North Valley Drive
- East North St from La Crosse St. to East Anamosa Street
- East North Street from East Anamosa Street to Eglin Street
- North Valley Drive from SD44/East Omaha Street to East North Street

This will also include determining the existing and future intersection level of service for each intersection along the study corridors listed:

- SD44/East Omaha Street and La Crosse Street
- SD44/East Omaha Street and Cambell Street
- SD44/East Omaha Street and North Valley Drive
- Cambell Street and East Saint Patrick Street
- Cambell Street and East North Street
- East Anamosa Street and North Valley Drive
- East North Street and La Crosse Street
- East North Street and East Anamosa Street
- East North Street and North Valley Drive
- East North Street and Eglin Street

Additional intersections may be identified as the study progresses.

In addition to traffic operations analysis, the consultant will perform a multimodal corridor assessment that will evaluate bicycle, pedestrian, and transit operations for each study corridor.

9. Traffic Variables for Design:

The consultant shall determine the traffic design variables necessary to design the build scenarios of this study. These variables include, but are not limited to:

- Average Annual Daily Traffic for the year of construction (AADT₂₀₂₅).
- Average Annual Daily Traffic for the future year (AADT₂₀₄₅)
- Design Hour Volume, 30th highest hour of the year. (DHV);
- Direction Distribution in the predominant direction of travel (D)
- Truck Percentage of DHV (T DHV)
- Truck Percentage of AADT (T ADT)
- Design speed(s) (V)

Design variables are to be determined for the following for all logical corridor segments as determined by the Build Scenarios developed in Task 5:

10. Safety Analysis:

The consultant shall identify existing and future safety issues (actual & perceived) along the SD44/East Omaha Street, Cambell Street, East North Street and North Valley Drive corridors of the No Build and Build Scenarios. The analyses should be done in accordance with Parts B and C of the AASHTO Highway Safety Manual.

11. Route Assessment:

The consultant shall develop preferred alignments for proposed and future roadways identified on the Major Street Plan to include consideration of cost, traffic, safety, topography, and environmental factors.

12. Environmental Overview:

The study area for the environmental overview will be an approximately 200 foot buffer surrounding the study corridor except where noted below. The Consultant will collect, summarize, and provide the source of relevant existing data along the corridor, but will not develop an environmental finding document. The planning document should provide enough detail to document the project level environmental setting. The study should meet the regulatory criteria for use of a corridor or sub-area study in NEPA, as required by 23 CFR §§ 450.212(b) and 450.318(b).

The following environmental resources are expected to be required for the environmental overview. This list is not all-inclusive and is subject to change based on meetings with project stakeholders as the study progresses. Modifications to the list may be necessary. The consultant will conduct a “windshield survey” of the study area and utilize existing data from

previous studies conducted in the area and other agencies. No additional environmental information will be field collected nor will environmental clearances be obtained.

- The foundation for a purpose and needs statement that defines the goals and objectives or vision statement for the corridor and/or the recommended project(s).
- Local land use, growth management, or development plans and projections of future land use, natural resource conservation areas, and development – This information should be available from the various local agencies.
- Consultation with resource and regulatory agencies for purposes of integrating interagency goals and plans into the corridor plan.
- Planning level evaluation of indirect and cumulative effects. This will need to include:
 - Defining the indirect and cumulative impact study area, which is assumed to be larger than the direct impact study area of the corridor study.
 - Creating a map of the study areas for direct, indirect, and cumulative impacts.
 - Identification of potential indirect impact causing activities of the build scenarios.
 - Identification of the potential direct and indirect impacts that may contribute to a cumulative impact.
- Environmental scans that produce preliminary identification of impacts and mitigation to environmental resources and environmentally sensitive areas:
 - Floodways and 100-year floodplain boundaries – The consultant shall obtain the FEMA FIRM designated floodplain areas within the Study Area.
 - Historic Preservation - The consultant will complete a records search and prepare a memo summarizing the potential of the Area of Potential Effect (APE) to contain archaeological sites and built resources of significance (buildings/structures) based on the windshield survey and preliminary research and outline recommendations for further work for compliance with Section 106 of the National Historic Preservation Act of 1966 (as amended). The records search will include a review of archaeological sites, historic buildings and structures, and previous investigations known to be located in and within a one mile buffer of the APE. Using this information, the consultant will prepare an outline of the results of this preliminary research and windshield survey, identify potential effects and make recommendations for any further cultural resources work to be done during the design phase of any potential project(s).
 - Hazardous Substances – This information will be obtained from various resource agencies.
 - Wetlands and Other Waters of the US –This information will be obtained from various resource agencies and through desktop analysis.
 - Wildlife/Threatened and Endangered Species – This information will be obtained from various resource agencies, including FWS' IPAC system.
 - Section 4(f) and 6(f) Resources— The consultant shall inventory and map the Study Area for Section 4(f) and/or 6(f) facilities. Determine any potential impacts or ROW acquisitions that may have potential to result in a use of Section 4(f) properties (for example publicly owned public parks, recreation areas, and wildlife or waterfowl refuges, or any publicly or privately owned historic site listed or eligible for listing on the National Register of Historic Places) or Section 6(f) properties (those that have received Land and Water Conservation Funds). Using this information, the consultant will prepare

recommendations for any further Section 4(f) or 6(f) work to be done during the design phase of any potential project(s).

The objective for the Environmental Overview is preparation for the initiation of the NEPA process for a proposed project action. The results and decisions of the planning process need to be documented in a way that is clear, suitable, and readily available for incorporation into a NEPA document.

13. Recommendations:

Based upon the results of the Traffic and Operations Analysis and public input received, the consultant team shall recommend a schedule of improvement projects for the SD44/East Omaha Street, Cambell Street, East North Street and North Valley Drive corridors. Recommendations should include an estimate of costs and a general timeline for implementation of each project.

14. Public Involvement:

A. Support the "SD44/East Omaha Street, Cambell Street, East North Street and North Valley Drive Corridors Study Advisory Team"

The Study Advisory Team is expected to meet 6 to 8 times (including teleconferences and/or videoconferences) during the project period for the consultant to provide regular progress reports and to solicit feedback from members regarding study progress and execution. Three (3) of these meetings are to be scheduled and held at least one (1) week prior to each public meeting to gather the Study Advisory Team's approval on the information being presented to the public. Other meetings will be held as deemed necessary. The Study Advisory Team may also meet at additional times without the consultant's involvement during the study period.

B. Conduct Three Public Meetings

There will be a minimum of three (3) public meetings during the project period at which the consultant will make the lead public presentations regarding study methods, findings and recommendations of the study or its sub-elements, and to receive public input. These meetings are expected at the following intervals:

- Project Kickoff / Data Collection / Existing Conditions Analysis
- Option Development (Task 6)
- Recommendations (Draft Final Report Stage)

The consultant will organize and notice these meetings. For each meeting, the consultant shall provide the MPO the public meeting notice for review and approval prior to its publication to ensure the notice meets MPO requirements. At a minimum, publication of the notice shall occur twice in each of the Rapid City Journal and Native Sun Times, with the last notice published a minimum of 10 days prior to the meeting. The final proof from the publisher of the meeting notice shall be provided to MPO prior to publication. An Affidavit of Publication from the publisher will be required in the invoice for reimbursement. The SDDOT,

the City of Rapid City, and the Rapid City MPO shall all be allowed to issue press releases based upon the public notice and advertise the meeting on their websites.

The consultant is encouraged to use creative measures to inform commuters along the corridor of the public meetings. Direct invitation mailings to the immediate property and business owners along the study corridor and to residents in the neighborhoods adjacent to SD44/East Omaha Street, Cambell Street, East North Street and North Valley Drive corridors will be required. The consultant shall present and provide exhibits for the meeting.

C. Conduct Individual Land/Business Owner/Manager Meetings

There will be meetings moderated by the consultant with the individual land and/or business owners/managers for those parcels and businesses directly affected by potential access changes caused by any of the options developed. It is estimated that these meetings will take place in concurrence with the 2nd public meeting.

D. MPO Meetings

The consultant shall prepare documents for inclusion in MPO committee packets, handouts and any presentation material needed for City staff to present updates on the study throughout the study period.

E. Website

The consultant team shall maintain a website dedicated to the study. The website should be organized in such a way that will help dispense information to the public regarding the status of the study, public meeting announcements, presentations, meeting summaries, and all reports. At a minimum, the website shall allow for public input into the study during the duration of the study. The website can be used to assist in data gathering through web surveys and for other public participation actions as deemed appropriate as long as adequate advertising is provided. The SDDOT, the City of Rapid City, and the Rapid City MPO shall be allowed to provide direct links to the study website from their websites. The website should be active at least ten (10) days prior to the first public meeting. The website shall remain active for a period of at least 6 months after completion of the study to allow public access to the final report. All public meeting notifications and public comment sheets should list the website address.

15. Document Preparation:

The consultant shall provide the following items to the MPO contact person:

- Study Updates in word processing format (Microsoft® Word) or as Portable Document Format (Adobe® .pdf) of the study's progression due monthly,. If the study completion date needs to be extended, study updates will be expected around the 15th of every other month beginning on December 15, 2018 until submittal of the draft final report.
- An electronic copy for the City of Rapid City, the Rapid City MPO, and for the SDDOT, in word processing format (Microsoft® Word) or as Portable Document Format (Adobe® .pdf) of all draft reports and executive summary.
- Fifteen (15) printed copies of the final report and executive summary.

- An electronic copy for the City of Rapid City, the Rapid City MPO, and for the SDDOT, in word processing format (Microsoft® Word) as well as Portable Document Format (Adobe® .pdf), of the complete final report, complete access management pre-design report, and the complete executive summary. The PDF file shall be bookmarked for quick navigation to logical sections of the document.
- CADD (AutoCAD) design files for both conceptual design options and all approved standard typical sections.
- Copies of any pertinent working papers and electronic files created during the project.

After the Study Advisory Team's review of the draft reports, the MPO's contact person will advise the consultant as to its acceptability and will request any changes that may be desired. It should be anticipated that multiple drafts of the final report documents may be needed before final acceptance. The electronic versions of the executive summary and final report documents shall be due to MPO's contact person ten (10) days prior to the study's completion date.
